

SCT-AWD-021

Lifting Cleaning disc

Features

The cleaning dual-disc is a professional device designed for net cleaning, whether using crane or manual labour, the net will be cleaned by lowering and lifting the dual-disc with a rope. Utilizing innovative cavitation technology, it effortlessly removes marine fouling such as barnacles and oysters. With 750mm-wide titanium alloy discs, it offers exceptional durability and wear-resistance while cleaning. Nozzles can be interchanged according to the flow rate and pressure specifications of high-pressure pump stations. With optional back-mounted nozzles, the disc can easily adhere to the net.

Specifications

1. Model: SCT-AWD-021	8. Number of nozzles: 6-10
2. Dimensions: 840*450*260mm	9. Cleaning method: Manual or crane with a rope
3. Weight: 16Kg (in air)	10. Adhering the net: 3 thrusters
4. Cleaning width: 750mm	
5. Maximum pressure: 250bar	
6. Number of cleaning discs: 2	
7. Disc material: Titanium alloy
